

\$120 is a small price to pay for Peace of Mind

Mammograms save lives. The American College of Radiology, American Congress of Obstetricians and Gynecologists, and the American Medical Association all agree that women starting at the age of 40 should have a yearly screening mammogram.

The good news is that 92% of screening mammograms detect nothing suspicious. More detailed studies find breast cancer in only 2% of women. Which means, for almost all women, peace of mind is only a mammogram away.

The Breast Health Center at Pomona Valley Hospital Medical Center wants to give every woman access to that peace of mind by offering high tech 3D mammograms with SmartCurve paddle technology at the lowest possible price of **\$120**.

Call 909.469.9395 to schedule your appointment at one of our four convenient locations.

Peace of mind is just a phone call away, so call today.
